Review of Operations

Discontinued Operations

The Company had undertaken several initiatives such as improvement in product quality and cost reduction etc. in the past to improve operating and financial performance. However, the sluggish domestic demand growth in the polyester industry and the non availability of technical staff triggered by the ongoing Coronavirus (COVID-19) pandemic impacted operations and revenue during FY 22. Consequently, the manufacturing operations of the Company at its Polymerisation plant at Jolwa remained suspended since May 21.

There was a decline in total revenue from operation for FY22 at Rs.1687.43 Lakhs as compared to Rs.13114.42 Lakhs achieved in FY21 primarily due to significant fall in production & sale volume. Other operating income for the year ended 31 March, 2022 was at Rs.1.22 Lakhs as compared to Rs.2.57 Lakhs in the previous year.

Owing to lower volume, subdued domestic demand coupled with lower price realisation and prevailing Covid-19 restriction during 1st quarter of FY 22, the Company incurred Loss of Rs. 125.48 Lakhs for FY 22 as compared to Profit before tax of Rs. 1782.71 Lakhs in the previous year.

During FY 21 the production at its Polymerisation plant at Jolwa remained fully operational for most of the year. Therefore, the figures for FY 22 are not comparable with the previous year's performance.

The production at Polyester Spinning Division at village Jolwa, Taluka Palsana continued to remain suspended since 2016 primarily due to competitive pressure and prevailing market conditions in the yarn segment.

In the opinion of the Board, the operating environment of chips and yarn segment under the present scenario is not favourable, and deterioration of value of the plant assets (being in shut down condition) should be avoided. After evaluating various options, the Board decided to sell the assets of Jolwa manufacturing division considering the overall interest of stakeholders.

Continuing Operations

Your Company earned Other Income of Rs.606.09 Lakhs for FY 22 as compared to Rs.470.62 Lakhs in FY 21. The major component of Other Income comprises of unrealised gain on current investments in various mutual fund schemes and earnings on investments in bonds. Profit before tax for FY 22 was Rs.22.95 Lakhs as compared to Loss of Rs.41.66 Lakhs in FY 21.

Approval on Sale of Assets of Jolwa Manufacturing division

Pursuant to the approval of shareholders of the Company by way of postal ballot process on 12th February, 2022, and in terms of the powers delegated, the Board of Directors of the Company had entered into the necessary definitive agreements & executed the same on 29th April, 2022, for sale of its assets of Manufacturing Division situated at Village Jolwa, Taluka Palsana, Dist. Surat ('Undertaking'), together with all specified tangible, including land, buildings, and plant & machineries in relation to the unit, by way of an asset transfer on a 'Going Concern' basis on an 'as is, where is and what is' basis to Garden Silk Mills Private Limited.

Earlier, the Board of Directors of the Company at its meeting held on 1st January, 2022, subject to shareholders' approval, approved in principle, the proposal for sale of its assets of Jolwa Manufacturing division and authorised the Board to execute necessary definitive agreements.

Further, this event is the post balance sheet unadjustable event as of 31st March, 2022.

Industry Structure and Development

Indian Economy

An unprecedented scale of vaccination programme across the country along with supportive policies helped the Indian economy withstand challenges posed by the second and third wave of the pandemic. Second advance estimates by the Ministry of Statistics and Program Implementation put India's FY22 GDP growth at 8.9% as compared to a 7.3% contraction in FY21, suggesting an overall recovery of economic activities to pre-pandemic levels.

Pandemic-induced supply side disruptions have pushed up input costs, leading to inflationary pressure. India's Consumer Price Index inflation grew by 6.95% y-o-y in March 2022, breaching the targeted tolerance band.

The country is likely to face inflationary pressure due to turbulence in crude oil, a major foreign exchange expenditure item for India, and commodity prices. As per KPMG estimates, Indian economy is expected to grow 7.7% in FY 2022-23. The IMF has a more positive outlook on expectation that the country is being better placed to face Ukrainian crisis. It projects the Indian economic growth at 8.2% for FY 2022-23. (Source: IMF WEO April 2022, KPMG, Fitch Ratings)

India has seen consistent supply-side reforms rather than a total reliance on demand management.

Over the past few years, the government has undertaken several measures – it has deregulated several sectors, simplified processes, removed retrospective taxation, accelerated privatisation, and introduced production-linked incentives, among others.

The Russia-Ukraine war has raised oil prices, food prices and other commodity prices. Inflation is resurgent in the rest of the world. The US reports 8.5% and Europe around 7.5%.

The resurgence of COVID-19 infections in some major economies and the associated lockdowns may run the risk of further aggravating the global supply bottlenecks and input cost pressures.

India's slowing economic recovery faces fresh geopolitical risks. The loss of momentum comes amid disruptions from waves of virus outbreaks and lingering external risks, most notably from high commodity prices that are being exacerbated by the Russia-Ukraine crisis.

India, which meets nearly 80% of its needs through oil imports, is worried about the rising crude oil prices as it could widen its oil import bill while leading to inflationary pressures

There is no direct impact of the Russia-Ukraine crisis on India in terms of bilateral trade but a surge in oil prices poses considerable risk to the economy.

Opportunities, Challenges, Threats, Risks and Concerns

The hardening of crude oil prices, however, presents a major upside risk to the inflation outlook. The transmission of input cost pressures to selling prices remains muted in view of the continuing slack in demand.

Change in the policies of the Government of India may adversely affect economic conditions in the country generally, which could impact our business and prospects.

The Company is concerned about the various threats that it is exposed to which includes factors such as uncertain business environment including impact of COVID-19 pandemic, fluctuating rupee, slowdown in demand & possibility of increase in interest rates, etc.

The broader trends in the economy are expected to have a direct impact on your Company's growth prospects as well. Inflation is expected to remain elevated for the foreseeable future, driven by war-induced commodity price increases and broadening price pressures. In addition, the anticipated increase in interest rates by Central Banks in the coming year are also expected to lower growth and exert pressure on economies particularly those in emerging markets.

New and changing regulatory compliance, governance and disclosure requirements may increase our costs of compliance.

The Company tries to mitigate these risks by taking quick actions and proactive initiatives & sound business management practices and minimize the impact of these risks to the extent possible.

Business Outlook

There are signs of pickup in economic activity and the recovery should gather pace by the end of first quarter FY22, helped by the decline in COVID cases and faster vaccination.

India is poised to grow at the fastest pace year-on-year among major economies, according to projections made by the International Monetary Fund (IMF). This recovery is supported by large-scale vaccination and sustained fiscal and monetary support.

The results of growth-enhancing policies and schemes (such as production-linked incentives and government's push toward self-reliance) and increased infrastructure spending will start kicking in from 2023, leading to a stronger multiplier effect on jobs and income, higher productivity, and more efficiency—all leading to accelerated economic growth. Also, several spillover effects of geopolitical conflicts could enhance India's status as a preferred alternate investment destination.

RBI estimates the GDP growth rate for FY 2022-23 at 7.2%. The annual inflation rate in India edged down to 7.04% in May of 2022 from an 8-year high of 7.79% in the previous month. Inflation is expected to remain high for the next few quarters of FY 2022-23 due to higher commodity and fuel prices and negative terms of trade.

The RBI has already taken measures to contain inflation by tightening the policy rates. The next few quarters will be critical for India's economy as the Government and the RBI work at balancing the stress on inflation, currency and fiscal deficit.

Consumer confidence is improving and households' optimism in outlook for the year ahead has strengthened with an uptick in sentiments. Business confidence is in optimistic territory and supportive of revival in economic activity.

Our opinion is not modified in respect of this matter of emphasis.

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. Information other than the Standalone Financial Statements and Auditor's Report thereon (hereinafter referred as "other information")

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the Board's report and Management Discussion and Analysis included in the annual report but does not include in standalone financial statements and our auditor's report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the Standalone Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is material misstatement of this other information, we are required to report the fact. We have nothing to report in this regard.

Management Responsibilities for the Standalone Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Standalone Financial Statements that give a true and fair view of the financial position, financial performance, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for

preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Financial Statements, Company's Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- a) Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- b) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3) (i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- c) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and board of directors.
- d) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- e) Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 (f) under the heading, "Report on other legal and regulatory requirements" of our report on even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) Section 143 (3) of the Companies Act, 2013 ("the Act")

Opinion

We have audited the internal financial controls over financial reporting of SURAT TEXTILES MILLS LIMITED (hereinafter referred as "the Company") as of March 31, 2022 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

In our opinion and to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2022, based on the internal financial control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (hereinafter referred as "the guidance note") issued by the Institute of Chartered Accountants of India (hereinafter referred as "ICAI").

Management's Responsibility for Internal Financial Controls

The Company's Management and Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the guidance note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the guidance note and the Standards on Auditing issued by ICAI and deemed to be prescribed Under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that:

- (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;
- (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and
- (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes annexed to and forming part of the Financial Statements for the year ended 31st March, 2022

A. Corporate Information

Surat Textile Mills Limited (the 'Company') is domiciled in India. The Company's registered office is at 6th Floor, Tulsi Krupa Arcade, Puna-Kumbharia Road, Dumbhal, Surat-395010. The Company is listed on the Bombay Stock Exchange (BSE). The Company has discontinued its business of manufacturing Polyester Chips and Partially Oriented Yarn (POY) and the management is in the process of evaluating various options.

B. Summary of Significant Accounting Policies

B.1. Basis for Preparation of Financial Statements:

These financial statements have been prepared in accordance with the Indian Accounting Standards (hereinafter referred to as the 'Ind AS') as notified by Ministry of Corporate Affairs pursuant to section 133 of the Companies Act, 2013 read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015 as amended from time to time.

The financial statements have been prepared on a historical cost basis, except for certain financial assets and liabilities that are measured at fair value and assets held for sale are measured at the lower of its carrying amount fair value less cost to sell at the end of each reporting period. Historical cost is generally based on the fair value of the considerations given in exchange for goods and services. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Items included in the Financial Statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('functional currency'). The Financial Statements of the Company are presented in Indian currency (Rs.), which is also the functional and presentation currency of the Company, and all values are rounded to the nearest Lakhs with two decimal, except when otherwise indicated.

The financial statements are approved for issue by the Company's Board of Directors on 30th May, 2022.

B.2. Key Sources of Estimation:

The preparation of financial statements in conformity with Ind AS requires that management of the Company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, the reported balances of assets and liabilities and the disclosures relating to contingent liabilities as on the date of the financial statements. Examples of such estimates include:

- (i) The useful lives and Residual value of Property, Plant and Equipment
- (ii) Income Tax Assets / Liabilities
- (iii) Allowance for Expected Credit Loss of Financial Assets
- (iv) Future Obligations in Respect of Retirement Benefit Plans
- (v) Differences, if any, between the actual results and estimates are recognised in the period in which the results are known
- (vi) Fair value of Investments

Critical Accounting Judgements and Key Sources of Estimation Uncertainty

In the application of the Company's accounting policies, which are described above, the Management of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ

Notes annexed to and forming part of the Financial Statements (Contd.)

from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

(i) Impairment of Property, Plant and Equipment:

Determining whether property, plant and equipment is impaired requires an estimation of the value in use of the cash-generating unit. The value in use calculation requires to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. When the actual future cash flows are less than expected, a material impairment loss may arise.

(ii) Useful Lives and Residual Value of Property, Plant and Equipment:

The Company reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. During the current year, there are no major changes required to the useful lives of assets.

(iii) Provision for Litigations and Contingencies:

The provision for litigations and contingencies are determined based on evaluation made by the management of the present obligation arising from past events the settlement of which is expected to result in outflow of resources embodying economic benefits, which involves judgements around estimating the ultimate outcome of such past events and measurement of the obligation amount. Due to the judgements involved in such estimations the provisions are sensitive to the actual outcome in future periods.

(iv) Allowance for Expected Credit Losses :

The expected credit allowance is based on the ageing of the days receivables which are past due and the rates derived based on past history of defaults in the provision matrix.

(v) Income Tax:

Significant judgements are involved in determining the provision for income taxes, including amount expected to be paid/recovered for uncertain tax positions

(vi) Leases:

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgement. The Company uses judgement in assessing whether a contract (or part of contract) include a lease, the lease term (including anticipated renewals), the applicable discount rate, variable lease payments whether are in-substance fixed. The judgement involves assessment of whether the asset included in the contract is a fully or partly identified asset based on the facts and circumstances, whether the contract include a lease and non-lease component and if so, separation thereof for the purpose of recognition and measurement, determination of lease term basis, inter alia the non-cancellable period of lease and whether the lessee intends to opt for continuing with the use of the asset upon the expiry thereof, and whether the lease payments are fixed are variable or a combination of both.

B.3. Current versus Non-current Classification

Assets and liabilities are classified as Current or Non-Current as per the provisions of the Schedule III notified under the Companies Act, and the Company's normal operating cycle.

Notes annexed to and forming part of the Financial Statements (Contd.)

An asset is treated as current when it is:

- (i) Expected to be realised or intended to be sold or consumed in normal operating cycle;
- (ii) Held primarily for the purpose of trading;
- (iii) Expected to be realised within twelve months after the reporting period, or
- (iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- (i) It is expected to be settled in normal operating cycle;
- (ii) It is held primarily for the purpose of trading;
- (iii) It is due to be settled within twelve months after the reporting period, or
- (iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. Based on the nature of business and its activities, the Company has ascertained its operating cycle as twelve months for the purpose of Current & Non-Current classification of assets and liabilities.

B.4. Non-current assets held for sale

Non-current assets comprising assets and liabilities are classified as held for sale if it is highly probable that they will be recovered primarily through a sale rather than through continuing use. Such assets, are generally measured at the lower of their carrying amount and fair value less costs to sell. Assets and liabilities classified as held for sale are presented separately in the balance sheet. Property, plant and equipment and intangible assets once classified as held for sale/ distribution to owners are not depreciated or amortised.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss post tax from discontinued operations in the statement of profit and loss. All other notes to the financial statements mainly include amounts for continuing operations, unless otherwise mentioned. (For Details Refer Note 11)

B.5. Property, Plant and Equipments and Other Intangible Assets:

Property, plant and equipment held for use in production or supply of goods or services or for administrative purposes are stated at cost less accumulated depreciation less accumulated impairment, if any. The cost of fixed assets comprises its purchase price net of any trade discounts and rebates, any import duties and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use, and interest on borrowings attributable to acquisition of qualifying fixed assets up to the date the asset is ready for its intended use.

Capital work-in-progress for production, supply of administrative purposes is carried at cost less accumulated impairment loss, if any, until construction and installation are complete and the asset is ready for its intended use.

Depreciation Methods, Estimated Useful Lives and Residual Value

Depreciation is recognized (other than on capital work-in-progress) on a straight line method over the estimated useful lives of assets. Depreciation on assets acquired/ purchased, sold/discarded during the year is provided

Notes annexed to and forming part of the Financial Statements (Contd.)

on a pro-rata basis from the date of each addition till the date of sale/retirement. The estimated useful lives of assets are stated below:

Sr. No.	Category of Assets	Useful Life* (in Years)
1	Buildings:	
	(i) Factory Buildings	30
	(ii) Other Buildings	60
	(iii) Fences,Wells,Tube wells	5
2	Plant and Machinery:	
	(i) Continuous Process Plants	25
	(ii) Other	8 to 10
3	Furniture and Fixtures	10
4	Vehicles	8 to 10
5	Office Equipments	5
6	Electrical installations and Equipments	10
7	Computer Equipments	3 to 6
8	Property, plant and equipment individually costing Rs. 10,000 or less	1

*Estimated Useful life of assets consistent with the useful life specified in the Schedule II of the Companies Act, 2013.

The economic useful lives of assets is assessed based on a technical evaluation, taking into account the nature of assets, the estimated usage of assets, the operating conditions of the assets, past history of replacement, anticipated technological changes, maintenance history, etc. The estimated useful life is reviewed at the end of each reporting period, with effect of any change in estimate being accounted for on a prospective basis.

Where the cost of part of the asset is significant to the total cost of the assets and the useful life of that part is different from the useful of the remaining asset, useful life of that significant part is determined separately. Depreciation of such significant part, if any, is based on the useful life of that part.

Freehold land is not depreciated.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment, determined as the difference between the sales proceeds and the carrying amount of the asset, is recognized in the Statement of Profit or Loss.

Leases:

The Company, as a lessee, recognises a right-of-use asset and a lease liability for its leasing arrangements, if the contract conveys the right to control the use of an identified asset.

The contract conveys the right to control the use of an identified asset, if it involves the use of an identified asset and the Company has substantially all of the economic benefits from use of the asset and has right to direct the use of the identified asset. The cost of the right-of-use asset shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement

Notes annexed to and forming part of the Financial Statements (Contd.)

date plus any initial direct costs incurred. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For short-term and low value leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the lease term.

B.6. Impairment of Tangible Assets:

At the end of each reporting period, the Company reviews the carrying amounts of tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss, if any. When it is not possible to estimate the recoverable amount of individual asset, the Company estimates the recoverable amount of the cash generating unit to which an individual asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing, value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessment of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in the Statement of Profit and Loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. The reversal of an impairment loss is recognized immediately in the Statement of Profit and Loss.

B.7. Inventories:

Inventories are valued at the lower of cost and net realisable value. Costs incurred in bringing each product to its present location and condition is accounted for as follows:

Raw materials, stores and spare parts and traded goods: cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis.

Finished goods and work in progress: cost includes cost of direct materials and labour and a proportion of manufacturing overheads based on the normal operating capacity, but excluding borrowing costs. Cost is determined on weighted average basis.

Net realisable value represents the estimated selling price for inventories less all estimated cost of completion and costs necessary to make the sale.

Notes annexed to and forming part of the Financial Statements (Contd.)

B.8. Revenue Recognition:

Revenue is measured at the fair value of the consideration received or receivable. Amounts disclosed as revenue are inclusive of excise duty and net of returns, trade allowances, rebates, value added taxes, goods and service tax and amounts collected on behalf of third parties. Revenue from sale of goods is recognised when the substantial risks and rewards of ownership are transferred to the buyer which generally coincides with dispatch of goods from factory/stock points.

Interest Income from a financial asset is recognized when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset's net carrying amount on initial recognition.

Eligible export incentives are recognised in the year in which the conditions precedent is met and there is significant certainty about the collectability.

Revenue in respect of other income is recognised to the extent that the Company is reasonably certain of its ultimate realisation.

B.9. Foreign Currencies:

The financial statements are presented in Indian rupees, which is the functional currency of the Company.

Transactions in currencies other than the Company's functional currency are recognized at the exchange rate prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the closing exchange rate prevailing as at the reporting date. Non-monetary assets and liabilities denominated in a foreign currency are translated using the exchange rate prevailing at the date of initial recognition (in case measured at historical cost) or at the rate prevailing at the date when the fair value is determined (in case measured at fair value).

Foreign exchange differences are recognized in profit or loss in the period in which they arise except for exchange difference on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest cost on those foreign currency borrowings.

B.10. Employee Benefits:

Short-term Employee Benefits

A liability is recognized for benefits accruing to employees in respect of wages and salaries in the period the related service is rendered at the undiscounted amount of the benefit that is expected to be paid in exchange for that service.

Other Long-term Employee Benefits

The liability for earned leave is not expected to be settled wholly within twelve months after the end of the period in which the employees render the related service. They are therefore measured as the present value of expected future payments to be made in respect of services provided by employees up to the end of the reporting period using the projected unit credit method with actuarial valuations being carried out at each balance sheet date. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognized in other comprehensive income.

Notes annexed to and forming part of the Financial Statements (Contd.)

Post-Employment Benefits

(i) Defined Contribution Plans:

Payments to defined contribution retirement benefit plans are recognized as expenses when the employees have rendered the service entitling them to the contribution.

Provident Fund: The employees of the Company are entitled to receive benefits in respect of provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employees' basic salary (currently 12% of employees' basic salary). The contributions as specified under the law are made to the provident fund and pension fund administered by the Regional Provident Fund Commissioner. The Company recognizes such contributions as an expense when incurred.

(ii) Defined Benefit Plans:

For defined benefit retirement plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re-measurements, comprising actuarial gains and losses, the effect of changes to asset ceiling (if applicable) and the return on plan assets (excluding net interest), is recognized in other comprehensive income in the period in which they occur. Re-measurements recognized in other comprehensive income are reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognized in the Statement of Profit or Loss in the period of plan amendment.

Defined benefit costs comprising service cost (including current and past service cost and gains and losses on curtailments and settlements) and net interest expense or income is recognized in profit and loss.

The defined benefit obligation recognized in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

The obligations are presented as current liabilities in the balance sheet if the entity does not have an unconditional right to defer settlement for at least twelve months after the reporting period, regardless of when the actual settlement is expected to occur.

Gratuity: The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15/26 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation carried out at each balance sheet date using the projected unit credit method and the same is unfunded.

(iii) Termination Benefits:

Termination benefits such as compensation under employee separation schemes are recognised as expense in the period in which they are incurred.

B.11. Borrowing Costs:

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on

Notes annexed to and forming part of the Financial Statements (Contd.)

qualifying assets is deducted from the borrowing cost eligible for capitalization. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

B.12. Taxation:

Income tax expense represents the sum of tax currently payable and deferred tax.

Current tax

The tax currently payable is based on the taxable profit for the year. Taxable profit differs from profit before tax as reported in the statement of profit or loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The current tax is calculated using the tax rates that have been enacted or substantially enacted by the end of the reporting period.

Advance taxes and provisions for current income taxes are presented in the balance sheet after offsetting advance tax paid and income tax provision arising in the same tax jurisdiction and where the relevant tax paying units intends to settle the asset and liability on net basis.

Minimum Alternative Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the recommendations contained in Guidance Note issued by the Institute of Chartered Accountants of India, the said asset is created by way of a credit to the statement of profit and loss. The Company reviews the same at each balance sheet date and writes down the carrying amount of MAT Credit Entitlement to the extent there is no longer convincing evidence to the effect that Company will pay normal income tax during the specified period.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profits. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognized if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax asset is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when they relate to income taxes levied by the same taxation authority and the relevant entity intends to settle its current tax assets and liabilities on a net basis.

Notes annexed to and forming part of the Financial Statements (Contd.)

Current tax and Deferred tax for the year

Current and deferred tax are recognized in the Statement of Profit or Loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

B.13. Provisions and Contingent Liabilities:

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

B.14. Financial Instruments:

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments and are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or liabilities on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit and loss.

(A) Financial Assets

a) Initial Recognition and Measurement

All financial assets and liabilities are initially recognized at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are adjusted to the fair value on initial recognition. Purchase and sale of financial assets are recognised using trade date accounting.

b) Subsequent Measurement

(i) Financial Assets Carried at Amortised Cost (AC)

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Notes annexed to and forming part of the Financial Statements (Contd.)

(ii) Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI)

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

(iii) Financial Assets at Fair Value through Profit or Loss (FVTPL)

A financial asset which is not classified in any of the above categories are measured at FVTPL.

(iv) Investment in Subsidiaries, Associates and Joint Ventures

The Company has accounted for its investments in subsidiaries, associates and joint venture at cost.

c) Other Equity Investments

All other equity investments are measured at fair value, with value changes recognised in Statement of Profit and Loss, except for those equity investments for which the Company has elected to present the value changes in 'Other Comprehensive Income'.

d) Impairment of Financial Assets

In accordance with Ind AS 109, the Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss (FVTPL).

Expected credit losses are measured through a loss allowance at an amount equal to:

- * The 12-months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); OR
- * Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For trade receivables Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical default rates to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward booking estimates are analysed.

For other assets, the Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

e) Derecognition of Financial Assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109 – Financial Instruments.

For financial assets that are measured at FVTOCI, income by way of interest and dividend, provision for impairment and exchange difference, if any, (on debt instrument) are recognised in Profit or Loss and changes in fair value (other than on account of above income or expense) are recognised in Other Comprehensive Income and accumulated in Other equity. On disposal of debt instruments at FVTOCI, the cumulative gain or loss previously accumulated in Other equity is reclassified to Profit and Loss. In case of equity instruments at FVTOCI, such cumulative gain or loss is not reclassified to Profit and Loss on disposal of investments

Notes annexed to and forming part of the Financial Statements (Contd.)

(B) Financial Liabilities

a) Initial Recognition and Measurement

All financial liabilities are recognized at fair value and in case of loans, net of directly attributable cost. Fees of recurring nature are directly recognised in the Statement of Profit and Loss as finance cost.

b) Subsequent Measurement

Financial liabilities are carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments. Financial Assets Carried at Amortised Cost (AC).

c) De-Recognition

Financial liabilities are derecognized when, and only when, the obligations are discharged, cancelled or have expired. An exchange with a lender of a debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of a financial liability derecognized and the consideration paid or payable is recognized in the Statement of Profit and Loss.

d) Foreign Exchange Gains and Losses

Financial liabilities denominated in a foreign currency and are measured at amortized cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortized cost of the instruments and are recognized in the Statement of Profit and Loss.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured at fair value through profit or loss, the foreign exchange component forms part of the fair value gains or losses and is recognized in the Statement of Profit and Loss.

B.15. Cash and Cash Equivalents:

Cash and cash equivalents comprise cash in hand and unencumbered, highly liquid bank and other balances (with original maturity of three months or less) that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

B.16. Statement of Cash Flow:

Cash flow statement is prepared segregating the cash flows from operating, investing and financing activities. Cash flow from operating activities is reported using indirect method, adjusting the net profits for the effects of:

- (i) Transactions of a non-cash nature.
- (ii) Any deferrals or accruals of past or future operating cash receipts or payments.
- (iii) Items of income or expense associated with investing or financing cash flows.
- (iv) Cash and cash equivalents (including bank balances) shown in the Statement of Cash Flows exclude items which are not available for general use as on the date of Balance Sheet.

Notes annexed to and forming part of the Financial Statements (Contd.)

B.17. Events after Reporting Date:

Where events occurring after the Balance Sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the Balance Sheet date only of material size or nature are disclosed.

B.18. Earnings per Share:

The Company reports basic and diluted earnings per share (EPS) in accordance with Indian Accounting Standard 33 "Earnings per Share". Basic EPS is computed by dividing the net profit or loss attributable to ordinary equity holders of the parent entity by the weighted average number of equity shares outstanding during the period. Diluted EPS is computed by dividing the net profit or loss attributable to ordinary equity holders of the parent entity by weighted average number of equity shares outstanding during the year as adjusted for the effects of the effects of all dilutive potential ordinary shares dilutive potential equity shares (except where the results are anti-dilutive).

C. Recent Pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On March 23, 2022, MCA amended the Companies (Indian Accounting Standards) Amendment Rules, 2022, applicable from April 1, 2022, as below:

Ind AS 16 – Proceeds before intended use

The amendments mainly prohibit an entity from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, an entity will recognise such sales proceeds and related cost in profit or loss. The Group does not expect the amendments to have any impact in its recognition of its property, plant and equipment in its financial statements.

Ind AS 109 – Annual Improvements to Ind AS (2021)

The amendment clarifies which fees an entity includes when it applies the '10 percent' test of Ind AS 109 in assessing whether to derecognise a financial liability. The Group does not expect the amendment to have any significant impact in its financial statements.

Ind AS 116 – Annual Improvements to Ind AS (2021)

The amendments remove the illustration of the reimbursement of leasehold improvements by the lessor in order to resolve any potential confusion regarding the treatment of lease incentives that might arise because of how lease incentives were described in that illustration. The Group does not expect the amendment to have any significant impact in its financial statements.
